TROPHY EVALUATION TERMS

There is a reason we offer our trophy hunts within a set range of inches in size. We do not score the vast majority of our trophies prior to our hunter's arrival, plus it is impossible for your guide to judge these trophies to within a few percentages of their score in the field. Your guides WILL NOT judge the trophies in the field to a precise few inches, this is impossible. When a trophy is found, your guide will give you 4 possible judgement calls. No, Yes, Low End, High End.

- **NO:** The trophy is not in your contracted size range.
- **YES: THIS TROPHY IS WITHIN YOUR CONTRACTED SIZE RANGE:** The guide is certain the animal will fall within your contracted size range. If you decide to harvest the animal based on the guided judgment and a trophy is killed is in the lower contracted size range, you will not be charged for this animal and can continue to hunt. If the trophy is harvested and falls into the higher contracted size range, you will not be charged for the upgrade, but the hunt contract will be considered filled.
- **LOW END:** Your guide estimates that the trophy animal you are looking at will fall somewhere in the low end of your contract size range or at the top end of the lower size range. To take the shot and harvest this animal is now your choice and if the animal falls into the lower size bracket you will be refunded the difference.
- **HIGH END:** Your guide estimates that the trophy animal you are looking at will fall somewhere in the top end of your contract size range or at the bottom end of the lower size range. To take the shot and harvest this animal is now your choice, and if the animal falls into the higher size bracket you will be expected to pay the difference.
